

## rEolve™ works

### eco-savvy performance modular backing

rEolve, our new closed loop recyclable thermoplastic polyolefin backing system, is another environmentally-forward innovation from Mannington Commercial. This eco-savvy performance backing contains a minimum of 20% recycled content and utilizes fewer raw materials than most modular carpet backing.

A giant step toward more energy efficient carpet manufacturing and dematerialization, rEolve is the next evolution in Mannington's modular backing platform. It joins Infinity® RE, a high recycled content backing that contains post-consumer carpet tile.

rEolve performs. Not only does it create an impermeable moisture barrier that prevents wick back staining, but rEolve's unique construction also ensures dimensional stability. Its exceptional durability is why we back it with a lifetime warranty.

## Mannington Works.

800 241 2262 [manningtoncommercial.com](http://manningtoncommercial.com)

And when the carpet's use-cycle is over, products with rEolve backing can be reclaimed via LOOP™ and returned to new Mannington flooring product.

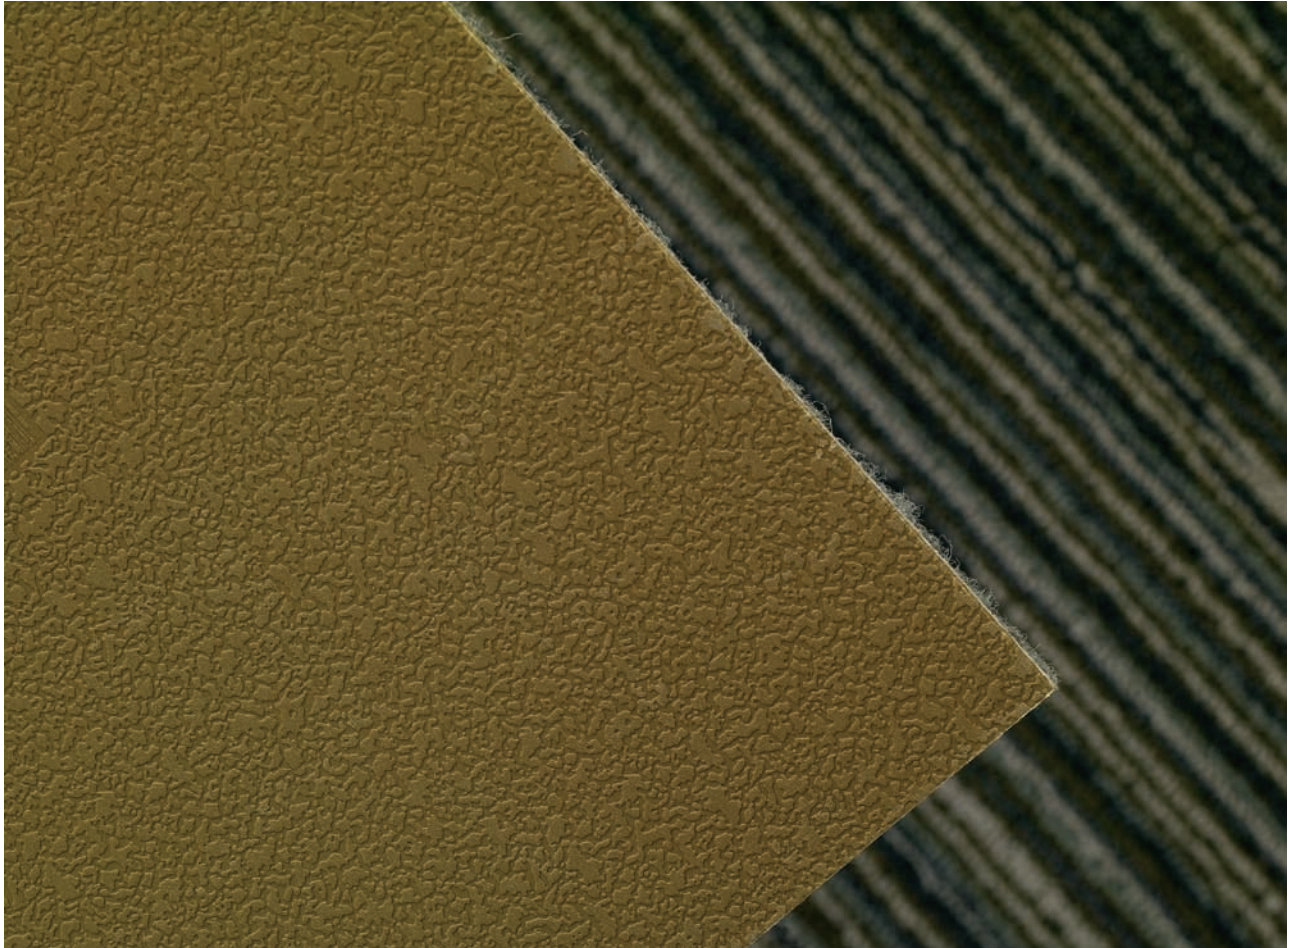

#### rEolve

- 10% post-consumer and 10% pre-consumer recycled content by total product weight
- 3-5% rapidly renewable resource by total product weight
- Dematerialization
- Renewable resource content
- Energy efficient
- Closed loop recyclable
- Contributes to LEED credits
