magna - 18007 blue ice
mannington's edge collection wall base - 926 deep sea blue

magna - 18013 cream beige

FEATURES

Magna is specifically designed for a variety of applications from tenant improvement, assisted living, education and retail.

Quantum Guard™ is a protective urethane wearlayer providing the ultimate ease in maintenance. Quantum Guard is applied with UV curing which significantly reduces the need for polish in normal traffic areas. Polish may be required in areas adjacent to exterior doors and extremely high traffic locations.

Solid color weld rods are color-integrated to blend or create a monolithic appearance. Solid color weld rods can be used to accent seams, enhance a border, or outline an inset.

Heat-welded seams provide an aseptic and integral surface that blocks the penetration of dirt and moisture. For optimal stain resistance performance, heat-welded seams should be sealed with a polish or sealer. Heat-weld is the preferred seaming method for healthcare and high traffic environments.

Limited 5 Year Commercial Warranty.

- Certified NSF-332 Gold
- Certified under FloorScore – an independent 3rd Party IAQ verification system for low emitting flooring. Approved as CHPS 01350 compliant and recognized in LEED EQ Credit 4.3
- ISO 9001 and 14001 registered manufacturing facility
- Manufactured in Salem, NJ 08079 and can contribute to LEED Credit 5.1 and 5.2
